

# An h1 header

---

Paragraphs are separated by a blank line.

New line... Some changes... :)

2nd paragraph. *Italic*, **bold**, and `monospace`. Itemized lists look like:

- this one
- that one
- the other one

Note that --- not considering the asterisk --- the actual text content starts at 4-columns in.

Convert arrows like `-->` or `==>` to  $\rightarrow$  or  $\Rightarrow$

```
--> →
<-- ←
<--> ↔
==> ⇒
<== ←
<==> ⇔
```

Block quotes are written like so.

They can span multiple paragraphs, if you like.

Use 3 dashes for an em-dash. Use 2 dashes for ranges (ex., "it's all in chapters 12--14"). Three dots ... will be converted to an ellipsis. Unicode is supported. ☺

## Write a todo list

---

- ☐ Step 1
- ☒ Step 1
- ☒ Step 1

## An h2 header

---

Here's a numbered list:

1. first item
2. second item
3. third item

## Here's a code sample:

```
#!/bin/bash

##### CONFIG
ACCEPTED_HOSTS="/root/.hag_accepted.conf"
BE_VERBOSE=false

if [ "$UID" -ne 0 ]
then
    echo "Superuser rights required"
    exit 2
fi

genApacheConf(){
    echo -e "# Host ${HOME_DIR}$1/$2 :"
```

(which makes copying & pasting easier). You can optionally mark the delimited block for Pandoc to syntax highlight it:

```
import time
# Quick, count to ten!
for i in range(10):
    # (but not *too* quick)
    time.sleep(0.5)
    print i
```

## An h3 header

Now a nested list:

1. First, get these ingredients:
  - carrots
  - celery
  - lentils
2. Boil some water.
3. Dump everything in the pot and follow this algorithm:

```
find wooden spoon
uncover pot
stir
cover pot
balance wooden spoon precariously on pot handle
wait 10 minutes
goto first step (or shut off burner when done)
```

Do not bump wooden spoon or it will fall.

Notice again how text always lines up on 4-space indents (including that last line which continues item 3 above).

Here's a link to a website <http://foo.bar>.

Move the following to next page with `<div class="page-break"></div>` .

Some Headlines.

# Headline 1

## Headline 2

### Headline 3

#### Headline 4

#### Headline 5

#### Headline 6

Tables can look like this:

<p> <b>                     Lorem ipsum                 </b> </p>	<p> <b>                     Lorem ipsum                 </b> </p>	<p> <b>                     Lorem ipsum dolor                 </b> </p>
<p>                     Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. and images can be specified like so:

## External image

 ![external image](http://placeholder.it/900x250/000/FFF)

900×250

## Local image

![local image](mali.jpg)

And note that you can backslash-escape any punctuation characters which you wish to be displayed literally, ex.: `foo`,  
 \*bar\*, etc.

Anbei testen wir ein paar Umlaute und Sonderzeichen...

Äußerst schön verändert
